## Cribs and bombs.

So, the student came to the exam. There are two options for passing exams: learn the abstract or make Cribs. If the student simply writes it off, the teacher will immediately understand. Therefore, you need to know at least the basic questions.

Why does a student need an mp3 player? To listen to music? No! This is the main lifesaver in any exam. If you have a day or two left before the exam, you can take the microphone and record the summary on the player. The earpiece can be hidden in a sleeve or under a scarf.

So, to the question how to pass the session? you can only give one answer — if you don't want to risk dropping out of uni, it's better to study during the semester.
